STUDENT VISAS

WHICH COURSE TO CHOOSE- With an eye to the future, students should give very careful attention to their chosen course to ensure they have good prospects for employment in the years ahead.

COURSE SELECTION – One of the key factors to consider in selecting a course should be what are the jobs for the future? Some studies have reported that jobs for the future will be those that require high levels of creativity and empathy. An ability to take decisions and turn them into insight will be of very high value.

New skills will be needed for emerging technologies such as:

- **Robotics**
- **3-D printing**
- **Data analytics**
- **Data security**
- **Encryption**
- **Cyber Protection**

Specific subjects can be selected from the core STEM areas, ie., Science, Technology, Engineering and Mathematics.
